Letter of Addendum

TO: All Offerors

FROM: Kimela Miller, CPO

DATE: 11/18/2024

RE: RFP Number: RFP# 251005C, Amendment No. 2
Commodity: Artificial Intelligence Recruitment Support System

This amendment is issued to incorporate into the RFP questions and their answers regarding the project.

Q1) Are you expecting that the AI solution we have will integrate with a pre existing software application your students and prospective students are using? Or do you expect the product we offer to be a standalone recruitment application that includes the AI components mentioned in the Scope of Work?

A1) The product should integrate with our current prospective student system.

Q2) Page 11 states "Vendor, with NMIMT support, must have the ability to train the system within forty-five (45) days of signing the agreement." Are you expecting for the full product to be deployable to users within 45 days? Or are you expecting the AI to be trained and showcase accuracy to your specific population within 45 days?

A2) The AI should be ready to deploy within 45 days.

Q3) Do you have a timeline you are willing to share with us on product launch?

A3) The timeline for the product launch will be impacted by the finalization of the RFP process with the intention of having the product go live by February 2025

Q4) Do you have a pre-existing vendor that is performing these services for you?

A4) No

Q5) For the SLATE CRM integrations, are you only expecting us to integrate presaved user data that is relevant to the recruitment process? Are there other data fields or content that you would expect integrated?

A5) The integration will include comprehensive information from across the campus for prospective students with the SLATE CRM.

Q6) Do you have a budget in mind?

A6) We do not share budget information.

The RFP is still due on December 3, 2024.
